FOR IMMEDIATE RELEASE

## **Nihon Kohden NKV-330 Ventilator System Receives US FDA 510(k) Clearance**

SANTA ANA, California – July 1, 2022. Today, Nihon Kohden OrangeMed, Inc. received U.S. Food and Drug Administration (FDA) 510(k) clearance for its NKV-330 Ventilator System. The NKV-330 is a non-invasive ventilator that provides respiratory support to adult and pediatric patients. It offers not only non-invasive ventilation but also invasive ventilation as well as high flow oxygen therapy. In addition, it provides continuous monitoring of CO<sub>2</sub> when using our cap-ONE® NIV mask. The cap-ONE mask is an NIV interface that allows quality CO<sub>2</sub> monitoring directly from the ventilator.

“The NKV-330 ventilator can help hospitals who face a limited choice of new non-invasive ventilator platforms.” said Dr. Hong-Lin Du, CEO of Nihon Kohden OrangeMed. “The continuous monitoring of CO<sub>2</sub>, the excellent portability, and many other features in the NKV-330 makes it a great choice for the hospitals and caregivers.”

The NKV-330 Ventilator System is distributed in the United States by Nihon Kohden America, Inc. and is expected to begin shipping in July 2022. It has been available outside of the United States since 2019.
